2 Days Workshop on “Deep Learning”

Machine Learning has nowadays become one of the most important parts of the technology. Deep Learning is a subfield of machine learning concerned with algorithms inspired by the structure and function of the brain called artificial neural networks. The ability to process large numbers of features makes deep learning very powerful when dealing with unstructured data. So for students it is necessary to understand the importance of deep learning and through this workshop they were able to experience real time working and understanding in the field of Deep Learning.
